

# RESEARCH PROJECT RESEARCH PROPOSAL

PROJECT TITLE:

#### **Table of Content**

#### 1. Contact details

- 1.1 Main applicant
- 1.2 Co-applicant(s)
- 1.3 Title of the Research proposal
- 1.4 Acronym of the research proposal
- 1.5 Keywords

#### 2. Summary

- 2.1 Research summary
- 2.2 Forensic relevance summary

#### 3. Scientific description

- 3.1 Research contents
- 3.2 Risk assessment
- 3.3 Existing infrastructure
- 3.4 Time plan and division of tasks

#### 4. Societal impact and forensic relevance plan

- 4.1 The problem and the proposed solution
- 4.2 Dissemination of the results
- 4.3 Ethical aspects and measures that will be taken

#### 5. Positioning of the research proposal

- 5.1 Uniqueness of the proposed research
- 5.2 Embedding of the proposed research in the institute(s) and (inter)nationally

#### 6. Financial planning

- 6.1 Personnel positions
- 6.2 Consumables, investments, travel, publication costs
- 7. References
- 8. Abbreviations and acronyms

## 1. Contact details

### 1.1 Main applicant

Name :
Bachelor's degree :
Telephone number :
E-mail :

### 1.2 Co-applicant(s)

Not applicable

- 1.3 Title of the Research proposal
- 1.4 Acronym of the research proposal

### 1.5 Keywords

Max. 5

### 2. Summary

#### 2.1 Research summary

Describe your research goals. Max 200 words.

#### 2.2 Forensic relevance summary

Max 200 words.

### 3. Scientific description

#### 3.1 Research contents

Give a clear account of what you are proposing including an introduction to the field, the innovative aspect of the research proposal and how the planned research will advance forensic biology. Max 1500 words.

#### 3.2 Risk assessment

Describe the risks, dependencies and when possible alternatives in the proposed research.

#### 3.3 Existing infrastructure

Specify here where and with which techniques and instrumentation the research will be physically performed.

#### 3.4 Time plan and division of tasks

Provide a scheme of the research planning (including milestones and a timetable, for which you can consider a GANTT chart).

## 4. Societal impact and forensic relevance plan

This plan must be clear for those without detailed specific knowledge. Max 500 words in total for sections 4.1, 4.2 and 4.3 together.

#### 4.1 The problem and the proposed solution

Describe the problem, the societal and possible economic consequences as well as the foreseen contribution of the current research.

#### 4.2 Dissemination of the results

Describe how you will disseminate your results with the forensic community.

#### 4.3 Ethical aspects and measures that will be taken

Only fill in if applicable. Possible relevant aspects are: research on animals, informed consent, privacy and data protection, research involving developing countries, biosecurity/dual use.

## 5. Positioning of the research proposal

Describe here to what extent the current proposal is discriminatory of other current research in the field. Where does the proposed work stand nationally and internationally? Max 300 words in total for sections 5.1 and 5.2 together.

- 5.1 Uniqueness of the proposed research
- 5.2 Embedding of the proposed research in the institute(s) and (inter)nationally

# 6. Financial planning

6.1 Personnel positions

Not applicable

6.2 Consumables, investments, travel, publication costs

Not applicable

- 7. References
- 8. Abbreviations and acronyms
